PROFILE

I have approximately 2.5 years of overall experience, with 1.5 years as a Python Developer, where I specialize in creating efficient, scalable solutions with a strong emphasis on automation, data processing, and scripting. My expertise lies in developing clean, maintainable code that enhances productivity and drives optimization. Additionally, I bring 11 months of experience as a Technical Associate, where I refined my problem-solving skills by assisting clients in troubleshooting and resolving technical issues.
